Curriculum Vitae
Iman Hamid

Contact Information:
Email: iman.hamid@duke.edu

Education:

Duke, University Program in Genetics and Genomics, PhD
2017-present
Advisor: Dr. Amy Goldberg
Certificate in College Teaching
GPA: 4.0

UCLA, Major in Biology, Bachelor of Science
2013-2016
Departmental Highest Honors, Summa cum laude
GPA: 4.0

Current Research:

I am interested in how selection can quickly shape genetic variation in recently admixed populations. My research focuses on developing and improving computational methods and statistics for detecting and characterizing selection in these understudied populations.

Past Research Experience:

NASA Ames Research Center, Space Biosciences Division: June 2016 – June 2017
I worked as a full-time employee under Drs. Sharmila Bhattacharya and Ravikumar Hosamani to determine the genetic and molecular responses to hypergravity-induced endoplasmic reticulum stress in Drosophila melanogaster. I also worked on characterizing the loss of dopaminergic neurons and associated behavioral changes in flies exposed to chronic hypergravity.

Honors Research in Ecology and Evolutionary Biology: March 2015-March 2016
I worked with graduate student Deborah Bird in Dr. Blaire Van Valkenburgh's functional morphology lab. Using 3D models rendered from skull CT scans, we studied differences in olfactory skull morphology, specifically the cribriform plate, across the order Carnivora. We asked whether these differences are a result of ecology or phylogeny and tested the prediction that aquatic animals have evolved smaller olfactory anatomy as compared with terrestrial species.

Teaching Experience:

Instructor: Fall 2021
Course: *Human evolutionary genetics*
Topics: population genetics, computational genomics methods, human evolution

Teaching Assistantship: Fall 2019
Course: *Gateway to Biology: Molecular Biology*
Duties: laboratory instruction, office hours, grading

Guest Lecture: Fall 2020 (planned: November 16, 2020)
Course: *Evolution* – Monmouth University, invited by Dr. Megan Phifer-Rixey
Topics: population history, adaptation, genetic variation, evolution

Other Work Experience:

GCB Summer Scholars Program in Genome Sciences and Medicine: May – July 2018

I worked under Dr. Susanne Haga as a graduate assistant for this summer research opportunity for freshmen and sophomore underrepresented minority undergraduates. I mentored nine students while they worked on their research, abstracts, and posters. I also designed and led workshops on communicating with advisors and applying to graduate schools.

Honors and Awards:

Bass Instructional Fellowship: Instructor of Record (2020)
NSF Graduate Research Fellowship Honorable Mention (2019)
Duke Graduate School Dean's Graduate Fellowship (2017)
Duke BioCoRE Scholar (2017-present)
Phi Beta Kappa National Honor Society (2016-present)

Golden Key International Honour Society (2015-present)
Jo-Belle Wolf Scholarship (2015)
Ella Okern Scholarship (2015)
Phi Eta Sigma Honor Society (2014-present)
Alpha Lambda Delta Honor Society (2014-present)
WM Stout Memorial Scholarship (2014)
Rose Gilbert in Memory of Maggie Gilbert Honors Scholarship (2014)
UCLA Achievement Scholarship (2013-2016)
UCLA University Grant (2013-2015)
UCLA Scholarship Recognition Award (2013)
UCLA May Ballard Scholarship (2013)
UCLA A. & R. Miller Scholarship (2013)
FEEA- Federal Employee Scholarship (2013)
NARFE Scholarship (2013)

Outreach:

MicroMoles: Learning STEMs from Curiosity: 2018-present

I am the President and Founder of this student group which writes short, illustrated children's stories based on recent graduate student publications.

UNC Morehead Planetarium IMPACTS Scholar: 2018-2019

As an IMPACTS scientist, I worked with professional informal science educators to design and conduct science-related classroom and community expo activities for the local community.

NC Museum of Natural Sciences: 2017-2019

I was a regular volunteer at the Visual World Investigate Lab, where I facilitated public interactions and explorations of the NCMNS makerspace.

DOinGG: 2017-present

I am a participant in my graduate program's outreach activities geared towards scientific education and communication to local schools.

Project Literacy at UCLA: 2015-2016

I mentored students from underprivileged backgrounds in academic and personal aspects. The aim is to improve literacy rates in students (all grade levels) from local schools and encourage them to pursue higher education.

Program Involvement:

BioCoRE Professional Development Student Leadership Team: 2020-present
Representative, Graduate and Professional Student Council General Assembly: 2018-2020
Committee Member, Genetics and Genomics Recruitment: 2017-2018
Recruitment for Duke Graduate School at ABRCMS: November 2018
