

Education

- since Aug 2021 **Doctor of Philosophy (PhD), Computer Science**, *University of St Andrews*, Scotland.
My PhD is under the supervision of Dr Ognjen Arandjelović and lies at the intersection of deep learning, computer vision, and medical imaging for digital pathology.
- Sep 2017 – Jun 2021 **Master in Science (MSci), Computer Science**, *University of St Andrews*, Scotland.
(2nd year direct entry) First-Class Honours, GPA: 95%
Master's thesis: "Determining chess game state from an image" (grade: 20.0/20).
Honours level courses include machine learning, AI principles & practice, language & computation, data-intensive systems, information visualisation, concurrency & multi-core architectures, constraint programming, software architecture, software engineering, complexity, OS, databases, data encoding, component technology, logic, software verification, compiler design & implementation.
- 2005 – 2017 **International Baccalaureate and Abitur**, *Dresden International School*, Germany.
IB Diploma: 40 points, German Abitur: 1.3
Valedictorian. Higher level subjects: maths, physics, computer science.

Experience

- since May 2018 **Working Student – Computer Vision**, *Robotron Datenbank-Software*, Dresden, Germany
Gained practical experience in deep learning and software engineering by developing deep learning models and deploying them to production in the Realtime Computer Vision (RCV) department.
- Selected and trained deep learning models for various industrial use cases, including a system for a car manufacturer that reduced the error rate of detecting faulty parts by 90%.
 - Developed a pipeline for object detection, classification and segmentation with TensorFlow.
 - Designed and implemented containerised infrastructure for training, evaluating, and deploying TensorFlow and PyTorch models for industrial use cases.
 - Implemented real-time object detection on video streams using TensorFlow.
- Jun-Aug 2019 **Software Engineering Intern**, *J.P. Morgan*, Glasgow, Scotland
Developed a data visualisation and reporting dashboard for an automated testing framework using Python, React, TypeScript, and SQL that gave the team new insights. Gained hands-on experience with Scrum, working in a team, and prioritising requirements from different stakeholders.

Prizes and awards

- 2020 Adobe Prize (£750) for the highest GPA in Senior Honours Computer Science
- 2018 – 2021 4x Dean's List Award of Academic Excellence at the University of St Andrews
- 2017 Valedictorian at Dresden International School
- 2017 Subject awards for mathematics and computer science
- 2010 – 2017 12x High Honour Roll (GPA over 6.0 of 7) at Dresden International School

Publications

Journal articles

- 2021 **G. Wölflein** and O. Arandjelović, "Determining chess game state from an image," *Journal of Imaging*, vol. 7, no. 6, Jun. 2021. ([link](#))

Datasets

- 2021 **G. Wölflein** and O. Arandjelović, *Dataset of rendered chess game state images*, Open Science Foundation, May 2021. ([link](#))

Invited talks

- Apr 2022 **KATY EU Project**
High-plex data reveal novel insights into the tumour microenvironment of clear cell renal cell carcinoma (presented with Raffaele De Filippis)

Skills

Programming	Python, C/C++, Java, SQL, JavaScript, TypeScript, Haskell, C#, \LaTeX , R
Technologies	PyTorch, TensorFlow, Keras, JAX, Docker, Apache Spark, Splunk, mongodb, Postgres, React, D3.js, Tableau
Languages	German, English (<i>mother tongue</i>); French (<i>B1</i>)

Selected projects and coursework

2021 **Determining chess game state from an image**, *master's thesis*, grade: 20.0/20

🌐 📄 For my master's thesis, I developed a system for identifying the chess position from a photo of a chess game using deep learning as well as traditional computer vision techniques. The system improves the state of the art error rate by a factor of 23. Further, I demonstrate a one-shot transfer learning approach to adapt the system to an unseen chess set based on just two images. The report is available [here](#) and a live demo is at chesscog.com.

2020 **Recap: configuration management for reproducible research**, *Python package*

🌐 📄 Research should be reproducible. Especially in deep learning, it is important to keep track of hyperparameters and configurations used in experiments. I had to write similar configuration management code in several projects, so I created a Python package and published it on PyPI.

2020 **Freeing neural training through surfing**, *SH project*, grade: 19.0/20

📄 For my undergraduate thesis, I investigated the local minimum problem in neural networks and developed a novel technique for training neural networks. Through this project, I developed independent research and academic writing skills whilst learning a lot about neural networks and machine learning. The report is available [here](#), and a paper is currently in preparation.

Courses and training

Jun 2020	Deep Learning Specialisation, <i>Coursera</i> .
May 2020	PyTorch for Deep Learning and Computer Vision, <i>Udemy</i> .
Sep 2019	Mathematics for Machine Learning Specialisation, <i>Coursera</i> .
Sep 2019	TensorFlow 2.0: A Complete Guide on the Brand New TensorFlow, <i>Udemy</i> .
2013 – 2014	C/C++ Course, <i>Volkshochschule Dresden (Community College Dresden)</i> .

Hackathons

Attending several hackathons allowed me to improve teamwork and leadership skills.

Oct 2020	NASA Space Apps hackathon.
Apr 2018	University of St Andrews StacsHack, placed 3 rd .
Oct 2017	Glasgow University Tech Society (GUTS) hackathon.
Nov 2017	J.P. Morgan Code for Good.

Volunteering

2021 **Developmental squad representative**, *University of St Andrews Volleyball Club*

I was elected to represent the developmental squad (recreational volleyball team) within the committee and club decision-making process. This role helped me improve communication and organisational skills.

2018 – 2020 **Secretary**, *University of St Andrews Muscle and Athletics Sports Society (MASS)*

As secretary of MASS, I was in charge of coordinating meetings, writing minutes, and taking care of administrative tasks. This position has helped me develop teamwork and organisational skills.

2010 – 2017 **Volunteer firefighter**, *Freiwillige Feuerwehr Possendorf*

I am passionate about giving back to the community. Since age eleven, I was a youth fire fighter in my local fire department. In 2015, I completed the training qualification to become a member of the adult fire department, and participated in active service until I moved to Scotland in September 2017.

Interests

In my free time, I enjoy playing chess, volleyball, lifting weights, and improvising on the piano.
