

I am a PhD student in computer vision who is passionate about theory and practice. I have five years of computer vision experience in industry, and in my PhD, I am applying computer vision techniques to digital pathology to improve the quality of cancer prognoses based on medical images. My research interests include weakly supervised learning, self-supervised learning, and vision-language models. I am always excited to work on new problems, not only by developing new deep learning models, but also seeing that they are deployed efficiently and have a real-world impact.

Education

- since Aug 2021 **Doctor of Philosophy (PhD), Computer Science**, *University of St Andrews*, Scotland.
My PhD is under the supervision of Dr Ognjen Arandjelović and lies at the intersection of deep learning and computer vision for computational pathology, funded by the NHS.
- Sep 2017 – Jun 2021 **Master in Science (MSci), Computer Science**, *University of St Andrews*, Scotland.
(2nd year direct entry) First-Class Honours, GPA: 95%
Master's thesis: "Determining chess game state from an image" (grade: 20.0/20).
Honours level courses include machine learning, AI principles & practice, language & computation, data-intensive systems, information visualisation, concurrency & multi-core architectures, constraint programming, software architecture, software engineering, complexity, OS, databases, data encoding, component technology, logic, software verification, compiler design & implementation.
- 2005 – 2017 **International Baccalaureate and Abitur**, *Dresden International School*, Germany.
IB Diploma: 40 points, German Abitur: 1.3
Valedictorian. Higher level subjects: maths, physics, computer science.

Experience

- Jul-Oct 2024 **Research Intern**, *Google*, London, UK
Conducted comprehensive evaluation of FitBit's activity recognition model, focusing on performance across diverse activity classes and demographic groups. Identified and quantified key failure modes, performed an in-depth analysis of root causes, and communicated actionable recommendations for model improvement to cross-functional teams.
- Jul-Sep 2023 **Research Intern**, *Else Kröner Fresenius Center for Digital Health (EKfZ)*, Dresden, Germany
During an internship at Prof Jakob Kather's Clinical AI research group at EKfZ for Digital Health (part of Dresden University of Technology), I developed a novel multi-zoom deep learning model for whole slide image classification, performed an extensive benchmarking study of self-supervised feature extractors for histopathology, and participated in various other projects including a study assessing the use of LLMs in oncology. Papers are currently in preparation.
- Jan-Mar 2023 **PhD Placement**, *Lay Summaries Ltd*, Glasgow, Scotland
Developed a NLP pipeline for automating the generation of lay summaries of EU clinical trials in a part-time PhD placement funded by The Data Lab.
- May 2018 – May 2022 **Working Student – Computer Vision**, *Robotron Datenbank-Software*, Dresden, Germany
Gained practical experience in deep learning and software engineering by developing deep learning models and deploying them to production in the Realtime Computer Vision (RCV) department.
 - Designed and implemented containerised infrastructure for automatically training, evaluating, and deploying TensorFlow and PyTorch models for industrial use cases.
 - Selected and trained deep learning models for various industrial use cases, including a system for a car manufacturer that reduced the error rate of detecting faulty parts by 90%.
- Jun-Aug 2019 **Software Engineering Intern**, *J.P. Morgan*, Glasgow, Scotland
Developed a data visualisation and reporting dashboard for an automated testing framework using Python, React, TypeScript, and SQL that gave the team new insights. Gained hands-on experience with Scrum, working in a team, and prioritising requirements from different stakeholders.

Skills

- Programming Python, C/C++, Java, SQL, JavaScript, TypeScript, Haskell, C#, L^AT_EX
- Technologies PyTorch, Triton, TensorFlow, Keras, JAX, Docker, Dask, Apache Spark, Postgres, React
- Languages German, English (*mother tongue*); French (*B1*)

Prizes and awards

- 2020 Adobe Prize (£750) for the highest GPA in Senior Honours Computer Science
2018 – 2021 4x Dean's List Award of Academic Excellence at the University of St Andrews
2017 Valedictorian at Dresden International School; subject awards for maths and computer science
2010 – 2017 12x High Honour Roll (GPA over 6.0 of 7) at Dresden International School

Invited talks

Feb 2024 **Tissue Image Analytics (TIA) Centre, University of Warwick**

A good feature extractor is all you need for weakly supervised learning in histopathology ([link](#))

Apr 2022 **KATY EU Project**

High-plex data reveal novel insights into the tumour microenvironment of clear cell renal cell carcinoma (with Raffaele De Filippis)

Selected projects and coursework

2021 **Determining chess game state from an image**, *master's thesis*, grade: 20.0/20

For my master's thesis, I developed a system for identifying the chess position from a photo of a chess game using deep learning and traditional computer vision techniques, achieving a 23× reduction in error rate compared to the previous state of the art. It also includes a one-shot transfer learning approach to adapt to an unseen chess set based on just two images. This project received 90+ stars on GitHub.

2020 **Recap: configuration management for reproducible research**, *Python package*

Research should be reproducible. Especially in deep learning, it is important to keep track of hyperparameters and configurations used in experiments. I had to write similar configuration management code in several projects, so I created a Python package and published it on PyPI.

2020 **Freeing neural training through surfing**, *SH project*, grade: 19.0/20

For my undergraduate thesis, I investigated the local minimum problem in neural networks and developed a novel technique for training neural networks. Through this project, I developed independent research skills whilst learning a lot about the internals of neural networks. The report is available [here](#).

Courses and training

Dec 2023 Focus on Peer Review, *Nature Masterclasses*.

Mar 2023 Clinicum Digitale, *Dresden University of Technology*: attended a two-week interdisciplinary spring school on medicine and technology.

Jun 2020 Deep Learning Specialisation, *Coursera*.

May 2020 PyTorch for Deep Learning and Computer Vision, *Udemy*.

Sep 2019 Mathematics for Machine Learning Specialisation, *Coursera*.

Sep 2019 TensorFlow 2.0: A Complete Guide on the Brand New TensorFlow, *Udemy*.

2013 – 2014 C/C++ Course, *Volkshochschule Dresden (Community College Dresden)*.

Service

2024 Reviewer for *ECCV BIC*

Volunteering

- 2021 – 2022 **Developmental squad representative, University of St Andrews Volleyball Club**
I was elected to represent the recreational volleyball team within the committee and club decision-making process. This role helped me improve communication and organisational skills.
- 2018 – 2020 **Secretary, University of St Andrews Muscle and Athletics Sports Society (MASS)**
As secretary of MASS, I was in charge of coordinating meetings, writing minutes, and taking care of administrative tasks. This position has helped me develop teamwork and organisational skills.
- 2010 – 2017 **Volunteer firefighter, Freiwillige Feuerwehr Possendorf**
I am passionate about giving back to the community. Since age eleven, I was a youth fire fighter in my local fire department. In 2015, I completed the training qualification to become a member of the adult fire department, and participated in active service until I moved to Scotland in September 2017.

In my free time, I enjoy playing chess, volleyball, lifting weights, and improvising on the piano.
