"Be the change that you want to see in the world."

Summary

Physics graduate with two years teaching experience and five years of research experience. Fields of interest include foundations of quantum mechanics, quantum arrival time, and time in quantum mechanics. I have published papers in papers and attended local and international physics conferences.

Experience

National Institute of Physics, University of the Philippines Diliman

Quezon City

SCIENCE RESEARCH SPECIALIST

Aug. 2019 - Dec. 2019

- Project: Standards and Testing Automated Modular Platform (Stamp)
- Principal Investigator: Giovanni Tapang, Ph.D.
- Develop a cheap alternative for existing ISO methodologies implemented in Regional Standards and Testing Laboratories (RSTLs).

National Institute of Physics, University of the Philippines Diliman

Quezon City

INSTRUCTOR

Aug. 2017 - Jul. 2019

- Taught recitation classes on Classical Mechanics (Physics 71), Optics and Electricity and Magnetism (Physics 72), Thermodynamics, Special Relativity, and Quantum Mechanics (Physics 73), and Modern Physics (Physics 104).
- Taught laboratory classes on Classical Mechanics (Physics 71.1), Optics Electricity and Magnetism (Physics 72.1), and Thermodynamics, Special Relativity, and Quantum Mechanics (Physics 73.1).
- Checked problem sets for Mathematical Physics (Physics 112), Statistical Physics (Physics 151 and 152), and Quantum Mechanics (Physics 241 and 242).

Education

University of the Philippines Diliman

Quezon City

PH.D. IN PHYSICS

Aug. 2019 - present

- Adviser: Eric A. Galapon, Ph.D.
- Candidacy Exam Title: Problem of time - from standard quantum mechanics to quantum gravity
- Scholarship: Department of Science and Technology-Accelerated Science and Technology Human Resource Development Program (DOST-ASTHRDP)

University of the Philippines Diliman

M.S. IN PHYSICS

Aug. 2017 - Jun. 2019

- Thesis title: Weak equivalence principle in the quantum regime: Compatibility with quantum mechanics, and tunneling effects via the different quantizations of the time of arrival operator
- Adviser: Eric A. Galapon, Ph.D.
- Studied the quantum violation of the weak equivalence principle for a structureless particle fired upward. This was done by quantizing the classical expression of the classical time of arrival using various quantization schemes, as well as supraquantization, to construct a time of arrival operator. The violation of the weak equivalence principle was demonstrated by showing mass-dependent quantum correction terms to the classical time of arrival as well as mass dependence on the time of arrival distribution.

B.S. IN PHYSICS

Jun. 2012 - Jun. 2017

- Thesis title: Synchronization of quantum and classical clocks, and energy translation using resolvent functional calculus for the confined time of arrival operators
- Adviser: Eric A. Galapon, Ph.D.
- The thesis aimed to study some physical and mathematical aspects of the time of arrival operator. The first half deals with eliminating the effects of quantum correction terms up to an arbitrary order for the classical time of arrival of a free particle. By doing so, we are able to synchronize a classical and quantum clock that uses the time of arrival of the free particle as time interval markers. The second half deals with the energy translation properties of the confined time of arrival operators.
