- Presentations to the DSA project's primary grant monitor and associated stakeholders on partial research results and future research directions.
- Prepared reports in multiple levels containing outstanding research and software development accomplishments and progress.

- Supervised undergraduate research position students (URPs) to perform research and produce research products.
- Provided advice and counsel to senior researchers and principal investigators on scientific and other advanced computing methods.

### **SENIOR SOFTWARE ENGINEER | RENSSELAER POLYTECHNIC INSTITUTE | APR/2018-AUG/2019**

- Co-designed, developed and maintained Rensselaer's semantic data framework and applications in support of semantic data projects.
- Lead designer and developer of semantic solutions in support of the DSA project.
- Delivered working prototypes for validating novel radio spectrum knowledge representation research approach, in coordination with the DSA primary grant monitor.

### **I.T. CONSULTANT | BANCO DO NORDESTE DO BRASIL | 2006-2018**

- Designed and developed novel user authentication infrastructure for critical financial transactions based on cutting-edge cryptographic technology, including algorithms (AES-128, RSA, TDES, SHA-512) and hardware APIs.
- Led contracts for systems enhancements and development of new ones.
- Coordinated software deliveries and quality assurance.
